Education

University of Alberta

Sept 2022 – May 2028

Bachelor of Science with Specialization in Computer Science — GPA: 3.6/4.0

Edmonton, AB

- **Awards:** Jason Lang Scholarship, Dean's List (2023 - 2024), **1st Place** - HackED Beta, **2nd Place** - HackED, **1st Place** - AI4Good Lab
- **Course Work:** Data Structures and Algorithms, Software Engineering, Database Management, Machine Learning, Operating Systems, Human Computer Interaction, Cybersecurity

Experience

Software Developer Intern

Sept 2026 - Present

PCL Construction

Edmonton, Alberta

Software Developer Intern

June 2026 - Sept 2026

Government of Alberta | Javascript, HTML, CSS, Git, Docker

Edmonton, Alberta

- Improved eServices accessibility scores **3–5%** by optimizing keyboard navigation, focus handling, and ARIA support.
- Built reusable JavaScript validation across **5+ workflows**, replacing generic errors with contextual messages and improving error handling.

Software Developer Intern

Oct 2025 – May 2026

What's The Deal? | Python, Gemini API, Pandas, MongoDB

Edmonton, Alberta

- Eliminated **566 hours** of manual work by building a **Python AI pipeline** using **Gemini 2.5 Flash API** to generate images and extract metadata for **1,700+ restaurants**, supporting a platform with **10,000+ users**.
- Developed **Python** ETL pipelines integrating the **Google Places API**, transforming data, and loading it into **MongoDB** to automate large-scale collection of **1,700+ restaurant records**.
- Reduced API costs by **\$40+** by designing a two-step data pipeline that pre-filters non-restaurant data, optimizing API usage and enabling scalable expansion to new regions

Programming and Development Intern

July 2025 – Dec 2025

Spartan Controls | TypeScript, Python, Power Platform

Edmonton, Alberta

- Saved **\$40,000** by developing internal tools with **TypeScript** and **Power Platform**, automating legacy workflows and multi-source data querying.
- Developed **TypeScript** and **Python** automation scripts that reduced on-call scheduling from **24 hours to 5 minutes** and saved **2+ hours per file** across operational workflows.

Machine Learning Fellow

May 2025 – June 2025

AI4Good Lab | Python, PyTorch, Pandas, Scikit-learn, Matplotlib

Edmonton, Alberta

- Built **H.O.U.S.E.D.**, an accelerator award **linear regression model** predicting homelessness risk, reducing **MSE by 10%** through feature engineering and model tuning.

Front-End Developer

July 2024 – Nov 2024

NeurAlbertaTech | HTML, CSS, JavaScript

Edmonton, Alberta

- Resolved **30+** frontend tickets by implementing fixes in a production codebase using **HTML, CSS, and JavaScript**, improving functionality and user experience for **6,000+ users**.

Projects

Event Hub | Java, Firebase, Android Studio, Git

Oct 2024 – Dec 2024

- Built an Android event management app using **Java, Firebase, and MVC**, implementing QR scanning and a lottery system to streamline event participation for **200+ users**.
- Contributed across the full **Agile SDLC** using **JUnit**, code reviews, **Git**, **UML**, and **Figma**.

Remindify | HTML, CSS, Flask, SQLite, Twilio, Git

Nov 2023

- **Won 1st place out of 30 teams** at HackED Beta by developing front-end features in **HTML/CSS** and contributing to **Flask back-end**, delivering a fully functional platform.
- Enhanced project functionality by integrating **MecSimCalc**, adding features for users with creative solutions.

Technical Skills

Languages: Python, C, C, JavaScript, TypeScript, Java, SQL, HTML, CSS

Frameworks & Libraries: React, Express.js, Node.js, Flask, NumPy, Pandas, Scikit-learn, Matplotlib, PyTorch

Databases: MySQL, MongoDB, Firebase, SQLite, PostgreSQL, Redis

Tools, Platforms & Operating Systems: Git, Docker, VS Code, PyCharm, Android Studio, Linux

AI Tools: Claude Code, Copilot, ChatGPT, Gemini (2.5 Flash)
